

EST09

Motorised trolley for interactive displays

- Stylish and sleek solution for your Optoma interactive display - Compatible with 3 and 5 Series interactive displays
- Anti-collision technology for added safety in schools - Ideal solution for education environments
- Easily adjust the height at the push of a button -Use the wired remote or adjust via the interactive display*
- Expand the storage space for your interactive display accessories - Optional shelf (TB01) can be installed on either upright for media equipment storage

The EST09 motorised trolley is a sleek and stylish adaptable solution for 65" to 86" interactive displays that fits well in any education or corporate environment.

Featuring height adjustment at the push of a button on the wired remote or via the interactive display (5652RK, 5752RK, 5862RK models only), the user has the ability to program two pre-set heights and quickly begin their lesson or presentation.
