

Epson ELPWP20 - Wireless Presentation System

With Epson's ELPWP20 wireless presentation system, collaborating is easy - just plug-and-play to share content on virtually any display.

Enhancing communication, creativity and collaboration is at the heart of any workspace and team. And now, thanks to Epson's ELPWP20 wireless presentation system, you can enrich this vision. Users can simply turn up, plug in their laptops and start sharing content.

With the ELPWP20, users can collaborate more easily than ever before. Using the compact wireless transmitter it's easy to share content at the touch of a button; simply launch any program on your laptop and the ELPWP20 makes it easy to show that content on your display - whatever display hardware you are using.

Simply plug the wireless transmitter into the PC or Mac and click on the built-in app to begin transmitting content from the laptop to the display. Alternatively, users can share using Miracast, which is built-in to Windows, Android and Chromebooks. Mobile devices based on Windows, Android, iOS or Chrome can also connect via Epson's free of charge iProjection app.

Up to 4 devices can be displayed simultaneously, and video conferencing systems can also be integrated via the HDMI inputs on the receiver.

The ELPWP20 receiver connects to the display via its HDMI input - meaning it is compatible with any display, regardless of manufacturer or technology.

To ensure security is maintained at all times, the signal between the transmitter and receiver is encrypted using AES encryption, protecting your transmitted content from unauthorised access.

As there is no physical button on the transmitters they can be sanitised after use, for full hygiene protection.

KEY FEATURES

- **Cable-free collaboration**
Wireless presentation system for maximum ease of use
- **Instant multi-screen sharing**
Display up to four devices simultaneously
- **Display-agnostic**
Compatible with all displays with a HDMI input
- **Compatibility with all major OSs**
Works with Windows, Mac, Android, iOS and Chromebooks
- **Miracast built in**
For simple sharing on compatible devices

PRODUCT SPECIFICATIONS
